Holistic

Pilates*: a holistic stretch and tone class using the Alexander Techniques that helps you improve core stability and Strength. Pilates can be suitable for people of all ages and fitness levels, including beginners and those with health conditions like arthritis or diabetes. Advocates say that the exercises can be adapted to provide either gentle strength training for rehabilitation or a strenuous workout for skilled athletes. Pilates focuses more on improving muscle tone

than building muscles, but it can still help you achieve greater stability and endurance. It can also help with pain relief, coordination, body awareness, and stress relief.

Beginners Pilates: Pilates is a great full-body workout that aims to improve core strength, flexibility, posture and overall muscle tone. The Beginners classes are an introduction to Pilates, suitable for men and women, all ages, no previous experience required. If you are experienced in Pilates and attend a more advanced class, we ask that you do not attend a beginners class. These are intended for people that are either beginners or people that struggle with a more advanced class.

Beginner's classes are designed for absolute novices: They focus on foundational movement and techniques, which may be too basic for someone with experience.

Advanced Pilates: This class introduces more complex exercises and variations, allowing experienced participants to deepen their understanding and improve their skills. A beginner's class may not provide the necessary stimulation or progression. An advanced class will push your limits and help you achieve new levels of strength, flexibility, and control. If you are unsure about your level, we would suggest a private session with one of our instructors at a cost of 45.00

Yoga: The ancient practice of yoga is a holistic system of exercise which increases flexibility, strength and concentration. Some Classes have mixed styles.

Vinyasa Flow Yoga: Vinyasa, also called "flow" because of the smooth way that the poses run is one of the most popular contemporary styles of yoga. **Tai Chi:** this class originates from the old-style Chinese shadow boxing. It is practiced for health, stress management and self-defence

Beginner's Yoga: This is gentle and accessible approach to yoga, focusing on foundational poses, breathwork, and building a basic understanding of yoga principles, suitable for those with little to no experience.

Yoga & Meditation: A gently immersive class designed to restore both body and mind, beginning with a 35-minute flowing yoga sequence to awaken movement, breath, and inner awareness. The practice then softens into 25 minutes of deeply nourishing yoga nidra, guiding you into profound relaxation and meditation. You're invited to bring a rug and bolster for comfort, allowing your body to fully surrender. At times, a light third-eye temple touch with oil may be offered, enhancing a sense of calm, connection, and subtle energetic balance.
